Give them a good example of succes

helps students through exercises.

You can go the students in face to face and you can help a particular student to resolve their doubt on a notebook so they can refer after they leave the class

writing down notes

in face to face you can go around to each student and help.

Allows them to develop learn new concepts and express their ideas.

Think of the needs of students, technology, learning styles, group management, etc.

What did the lecturer state as the SLA role?

Brainstorm ideas on how you would stimulate student learning

support for both lecturer and students

guidance

The most important thing is to interact with the students and their problems or doubts and guide them appropriatly

different ways of helping students gather study techniques

Give them positive feedback

Create a bigger goal that the student can aspire too.

in face to face its way easier to communicate and resolve problems

write handwritten notes

How different will this be in a face to face v online context?

in a face to face session you are able to help much quicker and also you can check the progress of the student much better.

In face to face some of the students are very shy they don't want to ask questions directly to the lecturer so they can turn-off there camera and ask questions to lecturer directly.

three different ways you are likely to support learning.

We can help them by visual, auditory, and reading and writing

Encourage students

3 different ways you are
likely to support learning.

Hadar Cohen → revising the material after the session

dont be afraid to ask Questions

We can help them by visual, auditory,
and reading and writing and etc.

**reference book or
other materials to get
that knowlegde**

Explane one more time !!!
